SEARCH ENGINES

A search engine:

A software program that searches a database and gathers and reports information that contains or is related to specified terms.
A website whose primary function is providing a search engine for gathering and reporting information available on the Internet or a portion of the Internet.

EXAMPLES: www.altavista.com
www.dogpile.com

Search Engines

- There are search engines, other than Yahoo and Google.
- For example, Dogpile is a search engine. This engine has Yahoo, Google, Life earch, and Ask jeeves all piled into one.
- Another one is, Hotbot. This engine gives you specific websites related to the information typed into the search bar.

- WWW.DOGPILE.COM
- WWW.ASKJEEVES.COM

Google Language Tools

- [About Google](#)
- **Search across languages**
- Type a search phrase in your own language to easily find pages in another language. We'll translate the results for you to read.
- Search for: My language: Search pages written in:
- Tip: Use [advanced search](#) to restrict your search by language and country without translating your search phrase.
- **Translate text**
- **Translate a web page**
- **Use the Google Interface in Your Language**

Google Translation

- Translate a web sites into foreign languages.
- Also, you can translate sentences. I translated www.marchofdimes.com to Japanese
- <http://www.google.com/translate?u=http%3A%2F%2Fwww.marchofdimes.com&langpair=en%7Cja&hl=en&ie=UTF8>
- http://www.google.com/language_tools?hl=en
- Your URL <http://www.sfcc.edu> change it to a language of your choice.
- Type into the search box Today is Monday, February 25, 2008 and change it to a language of your choice.

Power Point Presentation

Objectives:
To learn how to find scholarly
research.

To learn how to display findings in a
creative and organized way.
